MEMORANDUM FOR THE RECORD

SUBJECT: AEHAWKEYE/1

1. On this date the undersigned met with AEHAWKEYE/1 and observed no appreciable change in his mental attitude. The purpose of this meeting was to assess any changes and to give him further instructions.

2. [ ] of the Psychiatric Office met with AEHAWKEYE/1 yesterday afternoon and reported to me this morning that they were able to observe absolutely no change in his attitudes. Subject has still not realized the fact that he cannot go back overseas. He was told by the undersigned, [ ] and the Medical Office that there is no longer any position for him overseas and that the Medical Office would not approve any further overseas assignment in any area. This was repeated to him at today's meeting and at the end of the meeting he said once again, "How about sending me to Rome." It is becoming more and more apparent that the Subject just does not understand and is unwilling to face the fact that he cannot return overseas. He was made to understand by [ ] and also by the undersigned that there are practically no possibilities of obtaining a job for him with this organization. It has been repeatedly suggested to him that he seek employment on the outside. Approximately a month ago when the subject was discussed with him he said he would follow through and yet he treated the subject during this visit if it were a brand new idea.

3. Until his medical status and his contractual status and benefits are determined by the respective offices concerned, it is the plan of the undersigned to keep him occupied at home performing the various tasks which we feel necessary to have done. For the time being he is going to write a complete self-debriefing of his overseas assignment. This is to include all contacts, reason for contacts, results of contacts, jokes played on him, relationship with persons around him, etc. In addition, he is to write a resume of his contacts with AECOB/10's mother and come up with recommendations for further work to be done in the Latvian field overseas or for work which is now being done unnecessarily. We envisage that this project should last him for a period of several months and he was sent home at this time with the idea that he would return with the finished product and also bring back the gun which he is holding for AEBIAS/2. The psychologists have requested that we notify them when he returns so that they might see him again.
